Portfolio

PROFILE

Diligent Software Engineer specializing in Front-end development, proficient in JavaScript and React. Experienced in API integration and database management. Excel in team communication and independently driven tasks. Passionate about exploring new technologies and implementing creative solutions to software challenges.

SKILLS

Languages : **JavaScript** + Node.js, TypeScript, Liquid, HTML, CSS
Frameworks/Libraries : **React**, Redux, TanStack Query, Next.js, Express, Material UI, Styled-Components
Databases/Others : MongoDB, PostgreSQL, MySQL, SQLite, Supabase, Docker, Git, GitHub, Figma

EXPERIENCE

Frontend developer | Henkaku Jul 2023 – Present
- Designing and building UI components using TypeScript on Next.js.
- Collaborating and working in a team environment using Github.

Customer Service Sales Assistant | Thierry Chocolaterie, Patisserie,Cafe Sep 2022 – Present
- Thriving in a bustling café setting, demonstrating effective communication and multitasking skills.

Sales Planner | GLORY .Ltd Apr 2016 – Apr 2022
- Oversaw planning and management of exhibitions, focusing on UI and design elements.
- Coordinated software product development, defining requirements and tracking progress.
- Provided strategic consultation and support to affiliate banks.

PROJECTS

SpendShare ⬀ (React, TypeScript, Redux, MUI, Styled-Components, Supabase, PostgreSQL, Docker, SendGrid)
 Full-stack application facilitating bill-splitting and payment tracking
- Collaborated with team members using Agile methodology for effective project development and progress.
- Implemented user authentication with Supabase Auth, managed data with Redux and stored data in PostgreSQL.
- Utilized TypeScript to add static typing and React Hook Form for effective form handling.

GramReview ⬀ (React, ContextApi, useReducer, MUI, Styled-Components, Node.js, Express, MongoDB)
 Full-stack application that allows users to read, create, edit, and delete reviews for cosmetic products
- Stored data in MongoDB and fetched/updated/deleted the data on the front end.
- Implemented Context API and useReducer for user data management and utilized MUI components for a modern, intuitive UI design.

To do app ⬀ (React, TanStack Query, Node.js, Express, SQLite)
 Full-stack application enabling users to read, create, edit, and delete to-do tasks
- Stored data in SQLite and utilized TanStack Query for data manipulation on the front end.
- Expertise in diverse CRUD operations with innovative approaches such as global state, local storage, and SQLite data for enhanced user experience.

EDUCATION

Web and Mobile Application Development Diploma May 2022 – Present
  Cornerstone International Community College of Canada, Vancouver BC
Bachelor of Law and Politics Apr 2012 – Mar 2016
  Rikkyo University, Tokyo, JAPAN
